Payment Election **Step 6**

Designate how to receive payments. For direct deposit you must first set up accounts on the previous page. If an account is not available, return to the summary page and add it to the list of valid accounts. If multiple elections are allowed, designate the order and distribution of payments. To submit a valid payment election, the last election specified must have a distribution type of balance to capture the remaining amount, or the percentages must add up to 100 percent.
