CURRICULUM VITAE WRITING GUIDE

RESUME VS. CURRICULUM VITAE

Resume: Resumes are used when applying for positions in industry, non-profit, and public sectors. They are a personal marketing document that showcases a candidate's skills, achievements, credentials, and work experiences. The word itself is French for "summary" and although a resume is indeed a summary of one's experiences, it should be targeted to the position at hand and should not exceed one page in length (sometimes two depending on purpose or industry).

Curriculum Vitae: Curriculum Vitae (or CVs) are typically used when applying for jobs in academia, research, and medical fields. They may also be requested when applying for fellowships, grants, or graduate school admission. Curriculum Vitae is Latin for "course of life." Unlike a resume which is more concise and tailored to specific positions, a CV is comprehensive and often lengthy as it provides a complete list of one's education, certifications, research experience, publications, presentations, professional affiliations and memberships over the course of their career. There is no page limit!

When crafting your CV, keep these tips in mind:

- Include the titles of your research projects, if applicable
- Include the name of your primary investigator/research advisor (with their permission) for your research projects
- Include upper-level, relevant courses to your field and intended path
- If your CV is multiple pages, include your last name and page number at the top right (i.e. Smith, p.2)

PRACTICE YOUR RESEARCH/INTERNSHIP BULLET POINTS

Remember the Formula: Action Verb + Who/What + How/Why

Bullet Point Examples:

- Collaborated with primary investigator to research mechanisms by which small molecules compete with proteins for DNA binding.
- Presented hypothesis, methodology, and findings at Furman Engaged, an annual celebration of scholarship and immersive learning experiences.

- _____
(action verb) (who/what) (how/why)
- _____
- _____
- _____
