Met with the Library to discuss readily available charging methods.

1. On the Ground Floor, we are currently working to repair the phone charging booth (should be available by the end of the week).
2. Again, collaborating with the I.T.S, we are working to update desktop computers to screen monitors to provide larger screens for students. Again, through this, the USB-C cable will help charge students laptops. (Also, if you're concerned about this, we're only replacing about 80% of the current desktops, and not 100%).
3. On the First Floor, we have ordered two power stations that can be used to charge both phones and laptops, and can take up to 8 persons each (I know!! Isn't that great?). These will be stationed between the armchairs in the library.
4. Last but most certainly not least, we're working to make charging station tables. These tables will come with chargers - for the students who leave their [laptop] chargers in their rooms.

International Students [Need-Based] Airport Uber Rides:

1. About to schedule meeting with Andrew Cooter to discuss ways to successfully implement this project. Will give more updates later!

- Hey everyone! Sorry to have to miss the meeting tonight.
- TAG is this week! Get hype and good luck if you're participating (I'm already out).
- Paddock Trivia is this Thursday! Last two weeks have been Music Bingo but we're changing it up! First round starts at 7:00. I encourage everyone to go, it's a great time with great food, people, prizes, and trivia of course. (It does get pretty crowded so if you're passionate about getting a seat I'd get there early).
- Winter Ball coming up on February 9th! More info to follow for next week.
